

## Practical No. 4

**Title: - Implementation of ETL transformation with Pentaho**

**Aim: - ETL Transformation with Pentaho.**

**Lab Objectives: -**

**Students will understand following concepts:**

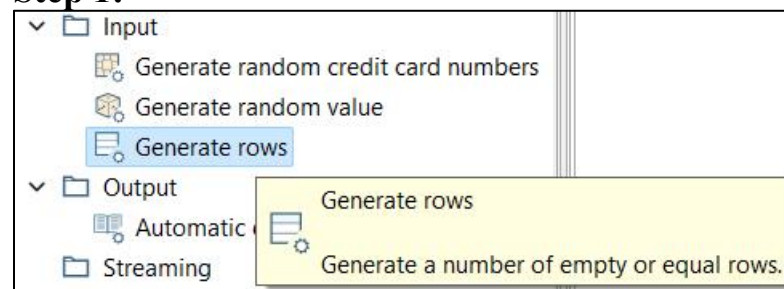

**I. Copy data from Source (Table/Excel/ Oracle) and store it to Target (Table/Excel/ Oracle)**

**II. Adding sequence, Adding Calculator, Concatenation of two fields, Splitting of two fields**

**III. String Operations, Sorting data, Implement the merge join transformation on tables.**

**Transformation1: Fetch Data From Data Set**

**Step 1:**

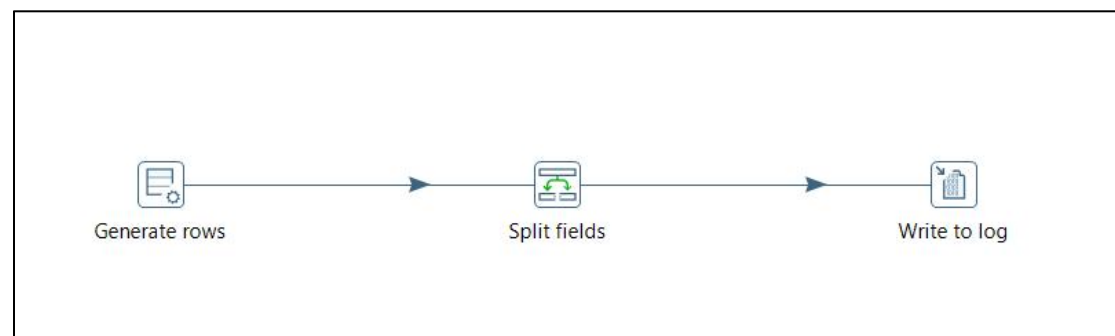

**Step 2:**

**Step 3:**

**Step 4:**

## Step 5:

Generate rows

Step name: Generate rows
